Subject: Microsoft Settlement

I am writing to give my opinion of the proposed Microsoft Settlement, as allowed under the Tunny Act.

I do not believe the settlement in it's current form does enough to redress the wrongs that Microsoft as a company has done in the past, nor does it prevent similar wrongs in the future. Specifically, it's ability or inability to function as a destructive monopoly. Please revise the settlement so that competition in the "desktop", "browser", "office suite" and other markets, can be restored.

Thank you,
